

# XPELAIR Model FR22/30 control switch

*-simplified wiring instructions-*

Note:

1. Reference local codes for wire gage and type for your particular installation,
2. Ensure power is disconnected at the electrical box prior to wiring these products,
3. Xpelair GX , WX and RX series for the United States are 120v-1ph-60hz,
4. **OPTIONAL** line voltage thermostat, de-humidistat, timer or similar automatic switch should be installed on the primary power before the FR22 switch,
5. FR22 is designed for one fan only per switch
6. Set the Fan Selector Switch (located inside fan) to Position #3 – refer to fan installation instructions if unfamiliar with this switch,
7. Recommended color code:
  - N/NF = white
  - L3/3 = Black
  - E/Ground = Green
  - 2 = Red
  - 1 = Brown
